COPPER ORES IN THE FORTUNA

Property Believed to Be Destined to Make Big Bonanza.

OVERLAND SHAFT CAVES IN

WHAT IT COSTS TO GET INTO BULLFROG CAMPS.

Indications now are strong that Si on Bamberger and his associates it he Fortuna company are destined t ank with the top-notch copper maglates of the Bingham camp. Quietly is Mr. Bamberger been rounding out possessions of his company during he last year or two until now it boasts of only an acreage that compares fa-orably with the largest holdings of ny company operating in the district, ut covers approximately 5,000 feet of the outcrop of five or six of the strongcontact veins in the camp. Ever of the ledges has produced much from old surface workings and a

imber of them are still contributing the local market. A strike made in Keystone ground on rtune tunnel level and first reported nday morning, has since been driven o at the rate of ten feet or so a day the ore shoot has widened our m five to seven feet and is growing der and richer as the drift progres-This mass of ore is now average about 6 per cent copper, 5 ounces or and \$1 in gold per ton, with an essa of iron of about 30 per cent, I when the superintendent telephed in to Manager Sidney Bamber-vesterday afternoon be stated that yesterday afternoon he stated that would be no trick at all to mine fifty his a day whenever he was given the gnal to do so. This strike has been ade in entirely virgin ground farther est than mining has ever been done the ground before and the manage-

ent has no fear of results. The vein in which this strike has en made runs through the northern rtion of the company's great domain, tile the remaining four or five ledges rallel it to the south. The plans of various points of all these veins lost of them have been opened to arying depths through shafts and nels, but in only one or two places s any great depth been attained, and these the veins have not been exared for any particular distance, as inpared with the long stretch along eir trend which is owned by the For-ha company. Everything has been arket between fifty and one hundred ns of lead-silver ore in addition to e copper rock which the latest strike ill provide, it is easy to see where e mine is going to pay its own way om the turn-loose, and then some Bamberger expects to continue ening up new ore bodies for year come in the different veins and that feature of the business? The ion of the ordinary mortal.

OVERLAND CLOSES DOWN.

Collapse of Incline Shaft Occurs-Damage Not Known Yet.

en closed down as a result of the colapsing of a large portion of the 1,400-oot incline shaft through which the property is operated. So far as known no one was injured and it is not yet known whether the shaft can be repaired or whether it will be necessary to sink another one

The property has been in the hands of a receiver for a long time past. About a year ago, E. W. Clark, manager of the Ophir Hill property, made an examination of the mine, tested the ores and expressed the conviction tha could pull the proposition out of the le. He was provided with the ne essary means to make the trial and went to work. Since taking charge he has demonstrated that \$2 ore could be worked at sufficient profit to meet mod-est operating expenses. In addition to keeping the mill going, he has been able to do a great deal of development work, until now there is between 60,000 and 70,000 tons of ore blocked on the lower levels that will net \$4 to \$7 per ton, and the mine is in physical condi tion to guarantee a handsome profit on every ton of ore treated.

A. L. Hoppaugh, attorney for the

preditors stated during the day that he was not in possession of details of the disaster which had ruined the shaft and he could not say what would be done until he had heard from Manager Clark. It is not thought, however, that the proposition will be abandoned just as it is reaching the stage where its future is assured. It may be necessary to give up the present incline, and, if that is decided upon, the chances are considered to be in favor of the sinking of a vertical shaft through which to do the mining in future, as the best ore hodies are located at a depth of not many hundreds of feet vertically be-neath the surface.

The old incline shaft, it is said, was never heavily timbered and that fact, coupled with the supposition that some Michigan of the older workings were mined in too close proximity to it, is believed to have been the main cause of the col-

WHAT IT COSTS TO RIDE.

Old Parkite Tells of Routes and

Fares into Bullfrog Country. Robert J. Brogleman, the old Parkite who recently returned from a two Gould & Curry 17 Utah Con. 06
years' trip into the Klondike country. H. & Norcross 61 Yellow Jacket .. 13

lieve, have located and own a valuable not springs property not far from Beatty, and in my judgment it will become very valuable in the near future as a bathing and pleasure resort. At the present time Hicks is fully employed in driving people about the country with a span af "jackrabbits" and a two-seated buckboard which he owns. He is cleaning up about \$20 a day without a bit of trouble. ont a bit of troub.

as there is plenty of water to maintain a good-sized population, and mines are being opened and discovered all around it. Two stages a week from Las Vegas now run in there. It takes about three and one-half days to make the trip from Las Vegas to Beatty and two and one-half days in the opposite direction. It is the quickest, cheapest and best way to go in from here. It costs Gold Mountain. best way to go in from here. It costs \$20 to get to Las Vegas and the stage fare from there to Beatty is \$20. To go in by way of Tonopah takes longer and costs much more. It costs \$48.50 to reach Tonopah from Salt Lake. From there to Goldfield the fare is \$5 and from Goldfield to Beatty is \$20."

ner and several others: The Goldfield Crown King The Goldfield Crown King company of Ogden has been it rated in the office of the secrestate. It is capitalized for with 200 shares of the par value each. C. F. Brown, W. W. Crog. A. Whitmeyer, A. J. He Kline, Thomas Arbon, W. F.

UNCLE SAM CONDITIONS.

Superintendent Says Strike Is Growing Bigger Every Day.

Superintendent C. C. Griggs of the Incle Sam Consolidated came in from Uncle Sam Consolidated came in from camp yesterday morning on personal business and will return to the mine this morning. He reports that the new ore channel east of the porphyry dike is opening up bigger and richer with every blast that is fired in the face of the drift and he is naturally most enthusiastic over the outlook for the future. The drift that was recently started on the 500-foot level of the old workd on the 500-foot level of the old work ings to penetrate the dike and open the new fissure at an additional depth of something like 140 feet, is progressing rapidly, but the superintendent was no ready to say when he would make the connections on that level as it was impossible to accurately say what the dip of the ore-bearing channel would be. Teams were secured early in the week and yesterday, Mr. Griggs said, the first two carloads of high grade ore from the drift in the new workings were started for the smelter. While there is nothing but the usual mine sampling to base an estimate upon, this has been of such uniform value that there is little question but what the cars will average

cent read, with \$1 of there in good per
ton.
While the management has not given
out any such statement, it comes from
a reliable source that the ore-bearing
fissure has been improving so rapidiy
and the average values have been hold-
ing up so well that the ore has been
taken out for shipment just as it was
broken. It is said that there has not
heen a mine car of waste to the rail-
road car of ore from the moment drift-
the state of the s

BACK FROM GOLDFIELD.

Salt Laker Says the Country Is Live

ly and Looks Good. W. W. Armstrong returned yesterday from a trip to Tonopah and Goldfield, where he has been sizing up conditions where he has been sizing up conditions and looking after interests which he represents. He says the country is certainly a lively one, and from all that he could see and learn, full of merit. Any number of Salt Lake and Park City folks were met by Mr. Armstrong and he understood that they were all on good speaking terms with prosperity and health.

During his trip to Goldfield Mr. Arm

Mining Notes.

Taylor & Brunton sampler yesterday Silver continues to move up a little. It was quoted yesterday at 58% per ounce.

L. H. Beason re urned from a trip into Idaho, where he has been on mining business, yesterday morning.

Manager George H. Dern came in from the Consolidated Mercur last night to take in the Shriners' function.

There will be no delinquent sale of Silver.

There will be no delinquent sale of Sil-ger Shield on account of the recent 1½ assessment. Every share has been paid

assessment. Every share has been paid upon.

Manager H. S. Joseph went out to the Silver Shield again yesterday morning to hize up conditions in the new ore body. The bins are now being filled with ore and the initial shipment from the strike will, be made in a few days.

M. M. Johnson, manager of the Cactus bonanza, in Beaver county, left for campagain last night. After seeing that everything is moving smoothly there he will go to the Majestic properties near Milford and spend a day or two shaping up the campaign there.

Dr. C. H. Rodi and Dr. W. T. King of Calumet, Mich., left, for the east last night, after having taken a long turn underground at the Daly-Judge property in Park City. The visitors had been enjoying a vacation on the coast and decided to stay in Utah a day or two and inquire into their mining interests here.

Manager Tony Jacobson of the Columbus Consolidated will leave for campthis morning, weather permitting, and spend a couple of days at the mine and mill. At the latter there is now sfored in the bins over 450 tons of concentrates, and the congestion must soon be relieved or it will become necessary to close down. It was expected that teams would reach camp yesterday, so the probabilities are that hauling has commenced by this time.

Manager C. W. Whitley of the American

leave for the New York headquarters of the corporation today. In the meantime everything that can be is being done to settle the fume problem at the company's big works in this valley. What is termed a "bag house" is now being constructed. It is to be 60x140 feet in size and will be equipped with no less than 3,780 burlap sacks or bags eighteen inches wide and thirty feet long. Through these it is proposed to filter certain of the gases thrown off by the furnaces, and, used in connection with other devices, it is hoped to accomplish much.

GRAIN AND PROVISIONS. Chicago, March 22.—The wheat market opened easy, mainly as a result of excelet weather conditions throughout the outhwest. May was ½@½ lower, at 1.15@ 1.15%; July was a shade lower to a shade ligher, at 20%@92%. Pit traders generally were inclined to sell the July option. A arge provision firm was an active seller of May early in the day, as a result of which the price of that delivery declined

May closed %c lower, at \$24.
Oats were weak. May closed at 30%, a loss of 3/46%.
Provisions were easy on heavy receipts of live hogs. At the close May pork was off 2½/45c, lard was down 2½ and ribs were a shade lower.
The leading futures ranged as follows:

NEVADA'S GOLD CAMPS.

Tonopah and Goldfield Richest in the World.

opah and Goldfield, Nevada, are undoubtedly two of the richest mining camps in the world. Over \$7,300,000 worth of ore has been shipped from one mine alone within the last year or so, the ore going from \$100 to \$300 a ton, with vast quantities in sight. The wonderful richness of ore in developed properties, and the assurance that the ntire surrounding region is "full of nineral," offers the greatest inducements to miners and investors. Tono oah now has a population of over 5,000 and is growing rapidly, while the towns in the Goldfield district have nearly 8,000 people. All branches of business are represented in these towns, and prices are not exorbitant. ground looks well and it is his nonest conviction that it is going to make a big mine and at the same time pile up lar service to both camps, and travel lar service to both camps, and travel lar service a matter of extreme diffi-

No miner or investor should overlook Tonopah and Goldfield. While marvelous finds have been made, it is more than probable that finds as rich will be made in the future, and the man on the ground is the one who will benefit from these strikes. Several millionaires have been made by these camps, for all they are so new, and many men have accumulated comfort-Ore and Bullion.

Ore and bullion settlements in this city yesterday, as reported by McCornick & Co., amounted to \$88,900, as follows: Silver, lead, gold and copper ores, \$31,700; base bullion, \$27,200; gold bars, \$10,500.

"Beatty is likely to prove about the most important town in that section, lowing as the closing quotations on the

New York, March 22.—The growing indifference for the demand for stocks had a chilling effect on speculative sentiment and the level of prices was let down considerably further today, in spite of the constant irregularity of the market. The fluctuations were largely due to the activity of the board room traders of the larger class, where

constant irregularity of the market. The fluctuations were largely due to the activity of the board room traders of the larger class, whose position was occasionally shifted in the progress of maneuvers designed probably to evade an undescribable following. This shifting process involved the buying of stocks now and then, but there was no evidence of positive strength in the market at any time. The growing conviction that no aggressive upward movement is to be looked for in the immediate future prompted considerable throwing over of securities by holders not prepared to retain their contracts through an indefinite decline. The entanglement over Venezuelan relations was the subject of discussion, and while no ground was perceived for immediate alarm, it was felt that the progress of the affairs concerning various powers in interest offered a delicate situation with room for troublesome developments.

The action taken yesterday by the directors of the Corn Products company in reducing the dividend on the preferred stock had a decidedly unfavorable influence, especially coupled, as it was, with the pessimistic remarks of the president of the company on the conditions in that trade. The shutting down of sugar refineries was cited as a parallel to show that trade might not be undeviatingly prosperous in all lines. The persistent heaviness of the U. S. Steel stocks in spite of all the glowing reports of the enormous demand for its products, had a discouraging effect on the advocates of higher prices. The merely nominal improvement indicated in the New York Central net at though compared with a period last year of extraordinary obstacles to transportation, was not relished. More attention was paid than recently to the apparently of ficially inspired disclaimers of some of the lately prevalent rumors of intended

Coffee and Sugar.

Coffee and Sugar.

New York, March 22.—Coffee—Spot Rio, quiet; mild, steady. The market for coffee futures opened steady at unchanged prices to an advance of 5 points on steady European cables and rather smaller Frazilian receipts. There was some liquidation by parties long of the near months, however, and while good people were supposed to be buying, prices gradually eased off; but after showing a net loss of about 5 points, rallied in the late trading, and the market was finally firm at unchanged prices to an advance of 5 points. Much of the business was switching. Sales reported, 116,200 bags, including: April, 6.20; May, 6.30; July, 6.4366,50; August, 6.550, 6.90; September, 6.606.70; October, 6.850, Sugar—Raw, unsettled; fair refining: Sugar—Raw, unsettled, fair refining; 4 5-16; centrifugal 96 test, 4%; molasses sugar, 4 1-16; refined, steady.
